

# Laser Tag Equipment Company Inc.

*Laser Tag Equipment Company is veteran-owned and is affiliated with Battle House Laser Combat, the leading Tactical Laser Combat operation in the U.S.*

## The Armory

Realistic, fast and accurate! Join us in taking laser tag to the completely new and exciting level of Tactical Laser Combat. Equip your Armory with products designed by military veterans and proudly made in the U.S.A. Machined aluminum receivers and key parts will withstand the punishment of the most intense simulated combat. Our build-out utilizes industry proven, professional components from Leapers, UTG, Monstrum Tactical, Magpul, Blackhawk and more.

Our guns have been battle tested by everyone from young children who drop them, bash them and put them through the ringer to veterans, law enforcement professionals, and die-hard fans who obsess over the details and have passed the tests with flying colors.

Easily customize your equipment build with realistic colors/anodizing, rail systems, and stocks.

Accessories can be easily added to our picatinny rail systems such as fore grips, sling attachment points, bi pods, lights, etc.

Powered by the industry leading "Magic" Laser Tag Mainboard, our system brings unparalleled power and versatility.

Our solution to their problems? Simple: design and build our own guns. You will not find rivets or glue in securing key internal components hindering replacement. Our in-house design is professional grade by a Chicago-based CNC company who designs and creates parts used in all major industries including the Department of Defense.

## Headshots Only.

Avoid having your customers wear the disgusting vests and headsets worn and populated with sweat by the last person to use the gun.

Our equipment relies on simple, easily-laundered Velcro headbands. Do you remember the last time you put on a laser tag vest? That cool, clammy, soaked feeling? Is it sweat? Is it cleaning solution? Who knows?

Do away with all that personal hygiene concern for sanitation and look out for your customer's health and wellness with our simple headset solution.

**The XM4** Modeled after the military's workhorse, the M-4

## **The XM4**

**\$1,100**

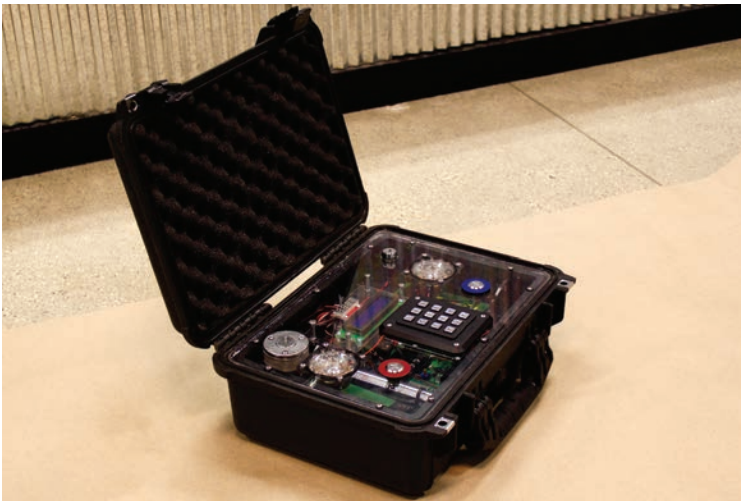

- Modeled after the military's workhorse, the M-4.
- Can be configured to a wide variety of settings such as semi-automatic, burst, full auto, or sniper, and more.
- Generally, for use with players age 14 and older.

## **The VIPER**

**\$1,100**

- Modeled after a Tactical Pistol (without a stock).
  - Can be easily and quickly outfitted as a submachine gun or standard rifle (with stock).
- Can be used with all age groups.

## **Briefcase Bomb**

**\$975**

Search and Destroy missions come to life with a simulated Briefcase Bomb. Customers will engage in an arming sequence, encounter random deactivation codes, and heart stopping countdowns. The Briefcase Bomb causes one of the most intense, adrenaline pumping scenarios your customers will ever experience.

## **Domination Cube**

**\$475 - 975**

Create a new level of gaming flexibility within your facility with our Domination Cubes. These area control objectives are available in both a mobile (portable) version and a wall mounted (fixed) location version. Our Domination Cubes allow for the creation of multiple mission scenarios and will prove to be one of your most popular game modes.

## **Air Strike**

**\$725**

One of our most unique and exciting systems, the Air Strike, is a multipurpose tool with one thought in mind: shock and awe. When the sound of a fighter bomber fills your arena and players are dying in droves in a precision strike, you'll know you've given your guests a memory that will last and that they will be talking about for years to come. (Audio equipment not included.)

## **Headbands**

**\$3**

A simple solution to a simple problem: Sanitation. Our use of simple Velcro, low cost headbands allows them to be fully laundered and sanitized after each use.

While competitors may promote their wireless vests and headbands that have built in sensors may seem great at first, we believe you'll quickly be struck with a classic case of buyer's remorse. You can no longer pretend they are not dirty or smelly.

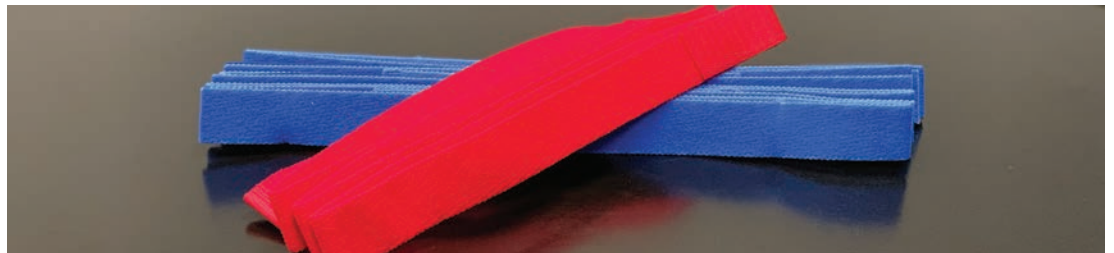

Consider the additional costs of several hundred to over a thousand dollars each for the vests and head sensors, which is in addition to the price of the laser tag gun itself, effectively

## **Barrel Safety End Caps**

**\$2**

When the end of a barrel meets a head, the head loses every time. Increase the level of safety in your facility with our low-tech, low-cost solution to a painful problem. The Barrel Safety End Caps reduce the potential impact of player collisions from a cut to a bruise or no injury at all. (One end cap included with each gun.)

doubling your up-front equipment costs.

Then finally consider that these pieces of equipment may work well until you must clean them. We've learned first-hand in talking to the owners and manufacturers that their cleaning solutions are far from desirable. On top of all that few things are as terrifying to parents as germs and taking the vest from one player who has soaked it through with sweat and/or other bodily fluids and putting it on their nine or ten-year-old is the thing of nightmares.

## General Terms and Conditions

- Equipment is made to order to your specifications with no refunds.
- Full payment is required to start all equipment orders.
- Pricing does not include shipping which will be calculated and charged with the final invoice.
